PRO-BOND 5085 (FLUID)

PRO-BOND 5085 is a protein based liquid binder with a strong setting bond, designed for use with a wide variety of cellulose materials. PRO-BOND 5085 is a high solids, high viscosity liquid designed for a wide range of dilution. Viscosity may also be controlled by temperature up to 140 degrees F. Bond flexibility may be adjusted with a number of natural plasticizers. PRO-BOND 5085 is a natural, biodegradable, re-pulpable polymer.

Typical Property Ranges of PRO-BOND 5085

Base	Collagen Protein
Solids	60%
Viscosity	1500-2000 cps
Wgt/gal.	10.5 lbs/gal.
Ph	5.0-6.0
Color	Dark Caramel

Packaging

PRO-BOND 5085 is available in drums, totes or bulk.

Environmentally Safe

PRO-BOND 5085 is non-toxic, contains no VOC's and has no atmospheric pollutant burned off. See Material Safety Data Sheet for specific information concerning storage, handling, transportation, and safety/health requirements.
